

BaseAgent

```
classDiagram
    class BaseAgent {
    }
    class AgentAgent["Agent.Agent"] {
        + __init__(self, list [list[str|int]] creation_options)
    }
    BaseAgent <|-- AgentAgent
```

The diagram illustrates a class hierarchy. At the top is the 'BaseAgent' class, represented by a white box with a black border and two empty internal compartments. Below it is the 'Agent.Agent' class, represented by a gray box with a black border and two internal compartments. The top compartment of 'Agent.Agent' contains the class name, and the bottom compartment contains the method signature '+ __init__(self, list [list[str|int]] creation_options)'. A blue arrow with a hollow triangular head points from the 'Agent.Agent' class up to the 'BaseAgent' class, indicating that 'Agent.Agent' inherits from 'BaseAgent'.

Agent.Agent

+ `__init__(self, list [list[str|int]] creation_options)`
